

Breathable mulching sheet

SUN MORE SHEET

Trademark registration application number: No. 2017-0008750

Description

It is a 'functional fabric' that achieves its permeability and waterproofing properties by laminating film with special nonwoven fabric. When you use it glossy side up, it blocks infrared rays and reflects light to help crop growth and coloring.

Features

Permeability | The surface of the film is white, which diffuses and reflects light to help crop growth. Excellent moisture permeability and ventilation to help manage moisture

Nonwoven fabric | Reinforcing agent for film helps to maintain warmth and moisture

Application | Greenhouse mulching of crops such as strawberry, tomato, bell pepper, melon, lettuce, chives

PP Foam Film : Strawberries

Crop Growth

Blocking Infrared Rays

Efficient Irrigation Management

Specifications

Width [Breathable Film] 1520mm [PP Foam Film] 750mm, 1150mm

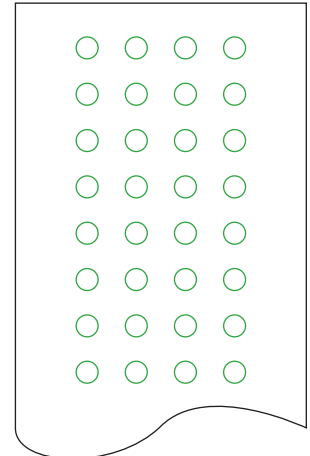

Perforation [750mm] Ø 60mm, Ø 80mm, Ø100mm [1150mm, 1520mm] Ø 50mm, Ø 80mm

Application

Breathable Film : Leafy vegetables

Punched Sheet
